

K-740™

Amscomatic's K-740 is an affordable high-speed folding system designed to automatically fold a wide variety of products with superior uniformity and reliability. The K-740 is engineered for dependable performance and low maintenance in demanding, high-production environments. This high-speed unit precisely folds shirts, pants, dresses, towels, and long sleeve garments. User-friendly controls simplify operation and changes to fold sequences. The K-740 can be easily integrated with other Amscomatic equipment into an automatic folding/bagging/sealing system.

Amscomatic's K-740 is solidly built of heavy-duty steel and premium components for dependable, long-lasting performance and smooth, quiet operation. Like all Amscomatic products, the K-740 automatic folder is built with Amscomatic's attention to quality, durability, and design excellence, and is backed by Amscomatic's unsurpassed service and support.
